## Recommendations

From: Valentina Dyankova

We've had the pleasure of knowing Alexander for 5 years now. In which time, we have found him to be friendly, very hard working, motivated and driven to complete goals.

Whilst providing services as an informatics tutor for children of all age groups at a competitive level, he impressed upon us with his understanding of data structures, optimisations of search algorithms and his ability to transfer knowledge in an comprehensible manner.

Alexander recently completed an excellent piece of work on a website for us (www.iati-shu.org). After being given our requirements, Alexander provided us with a number of possible options. All of which, we felt were very creative and elegant solutions to a convoluted problem. Effort was taken by Alexander to spend the time to work closely with us and help us understand the challenges ahead. This allowed us to work together as a team to provide a clear plan which he implemented in an exceptionally timely manner.

We would be more than happy to recommend Alexander and would relish the opportunity to work with him again.
